

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

7:55:29 PM

I support this initiative on the basis of fairness.

Although we have enjoyed the Benefits of a centralized and highly regulated market for many decades technology is enabling a more decentralized grid with more diversity of energy sources. All generators should be allowed to work c operatively on an even financial footing to produce usable energy to power our economy..even the little guy. Solar energy is unique in its environmental benefits but it is not the only answer.I am looking into new products like the micro grid
