

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

3:29:35 PM

As a tax paying Australian citizen, father and individual who cares about the planet for future generations, I support a fair price for Solar and i feel very strongly about the following points:

The feed-in tariff should increase in line with the wholesale price of electricity;
The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum;
The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar;
and
any personal examples about your solar systems and experiences with the feed-in tariff.

Your sincerely,
Paul Sharp
