SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
11:07:59 AM

The Electricity suppliers **MUST** be directed to give a fair price for solar generated feed-in power taking in to account it's true commercial & environmental value. Left to their own discretion they will continue to underpay for as long as they can get away with it.

During most of the day when I generate I get 6.1c per kWh & they charge 48.26c per kWh AND I pay 85.5c per day supply charge. This is completely out of balance even taking in to account the other expenses they carry.
