

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
11:15:41 AM

AFTER SPENDING \$50,450 on a 5 kw unit i was receiving about \$1200 a quarter which offset my other bill payments it was all the money i had put away fore my retirement onto aged pension from a invalid pension WHEN THE SOLAR ENERGY WAS FOUND TO BE A SAVOUR OF THE ENVIRONMENT TO REDUCE THE USE OF COAL FIRED POWER AND EVENTUALLY END THEM AS THEY GO PAST THEIR USE BY DATES i now find im getting a lousy \$150 Of which i was being paid for energy produced Also the purchase of my 4 set of meters that all were taken away but as my property paid for by me should have been left behind or the new smart meter given free.

I feel let down by the present government by not making the energy market not paying at least .33 cents per dollar per kilowatt i was producing extra . Its an appalling result when now the energy suppliers have upped the price of energy and blamed clean green energy for these increases The loss of my original .66 cents a Kw to now levels is beyond belief

So please improve my rebate or force the Supply chain to reduce their profits at the users expense . If i had the money Id go off grid .

Thank you for your time

So please reply to my email with any helpful suggestions that will help me with my rates so i can pay my other bills as not quite getting by on my pension as i have been forced into the position of eating cheap food from help services that prevent waste .

Thank you for your precious time
