SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
7:02:18 PM

We have done our bit to help Australia meet its energy-reduction targets by installing 3 kwt of solar PV panels on our roof.
So we seek a fair price for the solar power that we export.
The feed-in tariff should increase in line with the wholesale price of electricity;
The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum;
The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar.
