SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017
11:36:47 AM

The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar; we've had ours for many years, and are still being paid a small amount for our power, but a more reasonable price will encourage others. We must put solar (and wind) up there as a matter of urgency for this country- with incentives.
