SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

6:23:33 PM

Dear IPART

I support a feed-in tariff that is in line with the wholesale price of electricity. Anything else is inequitable and will be seen as a blatant subsidy for existing electricity suppliers.

I support that the feed-in tariff for solar to be regulated as a minimum and not a just to be a benchmark range.

Additionally, I support that the feed-in tariff for solar to reflect the value of solar toward enhancing the environmental, health and network sustainability benefits which are not costed at pricing.

regards

Russell Davie
