Submission: "It's not fair to punish solar owners who are helping bring down the price of electricity for all NSW energy users. Last year more than half of the retailers in NSW failed to offer a FiT within the benchmark range. The FiT needs to be regulated and mandated so that the retailers have to offer it as a minimum and the feed-in tariff should represent the true value of solar. This means govt recognising the environmental and health benefits and the network benefits of rooftop solar and the feed-in tariff.

Do not make any cuts to the solar feed in tariff, it should in fact be increased!"
