**SOLAR FEED-IN TARIFFS 2017/18**

To IPART

I read that you have proposed to more than double the NSW solar feed-in tariff benchmark to 11.6-14.6c per kWh in line with the increased wholesale price of electricity.

I wholeheartedly support this!

I strongly support a fairer price for solar and believe that the feed-in tariff should increase in line with the wholesale price of electricity.

The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum.

Also, the feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar.

Regards,

Renee Engl
