

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Saturday, 20 May 2017

10:36:21 PM

I welcome the IPART proposal to increase the NSW solar feed-in tariff to 11.6-14.6 cents per kWh. This would partly compensate for the 48 c/kWh I am charged during the Peak Period when there is little or no sun. My solar system is exporting twice as much power to the grid than I am using, thereby reducing the amount that has to be generated. While I am being paid 6c/kWh for this my retailer will be receiving 25 or 48c/kWh for it from other customers. I hope the proposed amount will be set as a minimum and indexed in line with the wholesale price of electricity.
