**SOLAR FEED-IN TARIFFS 2017/18**

**Tuesday, 9 May 2017**

1:40:21 PM

I thank IPART for their feed-in tariff increase proposal. However, I join Solar Citizens in asking that this be a mandatory minimum for the industry; and that it be increased regularly.

My personal belief that governments which are truly responsible and looking to the future for their citizens, should be aiming to limit global warming processes in all ways possible. One of many ways to do this, is to REQUIRE all electricity supply companies to also have MANDATORY minimum percentages of their power source being acquired from renewable energy sources; and that these required percentages should increase ANNUALLY -- in much the same way that pollution control emissions in motor vehicles used to be targetted; and how the Superannuation Guarantee was originally supposed to work. Therefore, I would ALSO ask you to consider these targets please, as well as the earlier request regarding feed-in tariffs.

Thank you.
