SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017
11:46:57 AM

My Solar feed-in tariff went from 60c/kWh to 6c/kWh on 1st Jan 2017. This is a rip off !!! The Solar feed-in tariff needs to be brought into line with at least the average charge /kWh of 24.5c/kWh being charged by the electricity suppliers. The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar systems.
