**SOLAR FEED-IN TARIFFS 2017/18**

8:59:01 PM

I strongly support a fair price for solar. I believe the feed in tariff should increase in line with the wholesale price of electricity and that it should be regulated so retailers have to offer it as a minimum. The environmental & health benefits of solar are reason enough to encourage more uptake of this technology. I myself feel privileged to own roof top solar panels and would like to see them transform other rooftops & families. I believe that raising the feed in tariff from its existing amount will help achieve this. Kind regards, Alex.
