Date of submission: Wednesday, 2 May 2018

Submission: "I have had solar panels for 7 years and was disappointed when the feed in tariff dropped in December 2016 from 60c/kWh to 6c/kWh. I was expecting a drop but did not expect such big drop. As of July 2017 this tariff increased to 9c/kWh and remains. I have not changed Electricity company throughout this time. I have used Origin for all my supply and use this company for 3 homes supply.

I hope we can get a decent feed in tariff through this submission.

Regards Robyn McEwan"
