SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
5:59:20 PM

I have been a user of solar energy since it was first introduced and appreciated a government which began by supporting it. Today I still use mainly solar during daylight hours.

I am convinced it is the future we must all have.

I have been appalled by recent pricing and the feed-in tariff should increase in line with the wholesale price of electricity. Retailers must offer it as a minimum. It must represent the true value of solar.

It is time the somewhat slow regulators realised the environment and health benefits of solar and acted accordingly.

I am still almost carbon neutral and welcome the increase in feed-in tariff.
