**SOLAR FEED-IN TARIFFS 2017/18**

**Tuesday, 9 May 2017**

12:30:03 PM

- 1) I support a fair price for solar;
- 2) The feed-in tariff should increase in line with the wholesale price of electricity;
- 3) The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum;
- 4) The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar

I had done studies in the past for wind, i.e. internalising external factors. The same applies to solar as well to reflect truly value of solar.

Thanks and kind regards, Dr Ravinder Soin
