Date of submission: Thursday, 18 October 2018

Submission: We received a letter dated 8/10/2018 to the resident. This is absolutely disgusting when Central Coast Council know our names. Council have the records as we receive our rate notices. Furthermore, IPART has required submissions to be in by 12/10/2018. This gives us no time at all to look into Council's proposal. This is when we heard of the proposal, the day we received this letter addressed to the Resident.

I must say Council's Code of Conduct is absolutely appalling and disgusting.

The Mountain area with a lot of farms, including residential and non-residential rate payers should not be charged at all for this STORMWATER DRAINAGE charge, as all the water that is not collected goes into the Central Coast water catchment for the Central Coast population to use.

In view of this i think the Council should pay us residents for supplying the water needs of the entire Central Coast. Furthermore the Central Coast Farmer's Association were not informed of this proposal. I strongly urge IPART to throw this ridiculous proposal into the Trash Can.

Sincerely

Ray and Christine Tomich
