SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
1:28:49 PM

• I support a fairer price for solar;
• The feed-in tariff should at least increase in line with the wholesale price of electricity and be regulated and enforced;
• The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum;
• The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar; and
• I still do not have a meter from Origin energy to track what I am entitled to receive - the energy company doesn't care that I am losing all round.
