

**SUBMISSION TO IPART REVIEW**  
**SOLAR FEED-IN TARIFFS 2017/18**

**Friday, 19 May 2017**

3:29:24 PM

It is about time that governments stopped kissing up to the 'big' power companies & started thinking about those voters who have installed, or are thinking of installing a solar system. To be paid between 6 & 10 cents per kwh FIT & be charged between 24 & 33 cents per kwh usage is nothing more than government sanctioned theft. Those citizens doing something about renewable energy should be applauded not ripped off. We are voters & we are growing in number!
