SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

4:01:24 PM

Having installed rooftop solar panels at considerable cost to myself, although on the aged pension, I totally support an increase in the NSW solar feed-in tariff. I believe it needs to be regulated and should increase in line with the wholesale price of electricity. The real value of solar installation is much broader and should thus be recognised. If people become more disgruntled and feel even more used by the power providers it can only lead to more people making the financial commitment to go off-grid.
