

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

11:36:57 AM

I make the following submission:

1. I support a fair price for solar.
2. The feed-in tariff should increase with the wholesale price of electricity.
3. The feed-in tariff should not be a benchmark range, it should be regulated so that retailers **MUST** offer it as a minimum.
4. The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar.
5. Like myself, other owners of rooftop solar have made an investment in the systems installed on our roof. This has the effect of lessening the total investment retailers and wholesalers would require. Rooftop solar owners should be recognized, and receive appropriate recompense, for their contribution to Australia's clean energy requirements.
