SOLAR FEED-IN TARIFFS 2017/18

Sunday, 14 May 2017

1:04:07 PM

To Ipart,

I fully support a fair and reasonable price [feed in tariff] for privately produced solar power fed into the grid and any move to obtain same.

The feed-in tariff should increase in line with the wholesale price of electricity and subsequent moves in that price.

The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum.

The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar.

Recent reductions in the feed in tariff in NSW has resulted in power charges increase of around \$100 per month. As a pensioner this is a 'bit of a blow'
