SOLAR FEED-IN TARIFFS 2017/18

Wednesday, 10 May 2017
10:35:19 PM

I support a fair price for solar where the feed-in tariff increases in line with the wholesale price of electricity. This tariff needs to be regulated so retailers have to offer this as a minimum and that it represents the true value of solar which includes environmental, health and network benefits of rooftop solar.
Our rooftop solar (1.0 kW) installed November 2008
