SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

1:01:49 PM

I am about to install a domestic solar power system and I wish for my voice - as a hardworking, taxpaying NSW consumer - to be heard.

Firstly, I support a fair price for solar;

I also believe the feed-in tariff should increase in line with the wholesale price of electricity. Furthermore, the feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum.

Ultimately the feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar.

When I set up my solar in a few months time, I hope for a fair and equitable outcome for the effort I am personally putting in to help the environment and the health of our city and planet.
