SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017

4:42:50 PM

â€¢ I support a fair price for solar;

â€¢ The feed-in tariff should increase in line with the wholesale price of electricity;

â€¢ The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum;

â€¢ The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar; and

â€¢ The current low feed-in tariff is discouraging me from installing solar panels. My DA has just been approved - I am in the process of considering my options. How about making the system fairer & assisting residents to transition to cleaner, locally produced energy.
