SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

5:39:58 PM

With such poor government over the years and now state Government looking to privatise electricity, if solar rebate is not at least 15c private solar installations will be better off Going off grid completely and as no one can ever prove ownership of the sun no fees can ever be legally be charged to solar producers. Therefore the best option for government is to legislate that a minimum of at least 15cper kW hr be paid before its to late.
