

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
6:39:46 PM

In order to keep the retailers honest in their treatment of solar owners I believe that IPART should mandate that the feed in tariff should not be less than a percentage of the standard charge for electricity consumed at the premises - possibly expressed as not lower than 40% of the standard shoulder tariff or 70% of the standard off peak tariff whichever is the greater. As the majority of solar generation and feed-in takes place during the shoulder period this still leaves the retailer with a very generous 60% margin.
