**SOLAR FEED-IN TARIFFS 2017/18**

**Monday, 22 May 2017**

11:40:30 AM

I support a fairer price for solar. The feed-in tariff should be increased in line with the wholesale price of electricity, and electricity prices are rising. The feed-in tariff should be regulated so retailers offer the minimum. The feed-in tariff should be at a level that truly represents the investments we have made into rooftop solar and the benefits.
