

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017
11:28:28 AM

I fully support higher feed-in tariffs for home PV cells to represent the true value of the electricity they are regenerating. That tariff should also rise over time to encourage more people to adopt PV cells on their roofs. All this is necessary to be done NOW to avert the damage done to the environment and future generations from fossil fuels.
