SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

3:20:36 PM

I totally support a fair price for solar feed in power especially from homes. The feed in tariff should also increase in line with the wholesale price of electricity. This latest benchmark price from the Independent Pricing and Regulatory Tribunal should be the minimum offered by retailers. As retailers are using 'Smart Meters' to charge different and expensive tariffs during the day then this should also be reflected in the feed-in tariff to consumers.

It is about time the government started to get behind all this and realise this is the future.
