Submission: Do away with distance bands and just charge for actual distance up to the current distance caps.

Extend weekly discounts and caps to credit cards. Opal cards are unnecessary now we know the machines can read credit cards. In a few years it will seem weird to even use physical cards since they can be stored on smart phones.

Change the wording of off peak train pricing. Off peak is the default, peak = trips towards CBD in AM rush window and away from CBD in PM rush window. "Congestion charge".
