**SOLAR FEED-IN TARIFFS 2017/18**

**Saturday, 20 May 2017**

12:45:10 PM

I support a fair price for solar:

- \* The feed-in tariff should increase in line with the wholesale price of electricity.
- \* The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum.
- \* The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar.
- \* The feed-in tariff should be supporting and incentivising households to invest in renewables in order reduce overall tax payer burden for electricity infrastructure and to contribute to national carbon emission targets.
