SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
12:36:45 PM

I have Solar panels on my roof and I find it preposterous that what I feed into the grid is being paid at such a pittance. To be fair the price paid for feeding the grid should be at least the same as what I pay for usage, after all I pay separate more for the service. I would like to know that you support a fair price for solar;
The feed-in tariff should increase in line with the wholesale price of electricity;
The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum;
The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar;
and
any personal examples about your solar systems and experiences with the feed-in tariff.
