SOLAR FEED-IN TARIFFS 2017/18

Friday, 12 May 2017
1:18:01 PM

I support a fair price for solar feed in, but 11.6-14.6c per kWh is not good enough, it must be at least double to be almost fair and reflect the true value of solar. The feed in tariff should also be tied to increases with the wholesale price of electricity.
