

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017
11:26:47 AM

We support a fair price for solar and have been active in trying to bring this about. The feed in price presently is unregulated and unfair and is leaving the solar industry and owners unsure about what will happen next. A fair price should be linked to wholesale prices and increased as they increase. It should represent the true value of solar energy and should be at a level to encourage more solar use, therefore reducing dependency on dirty, climate warming fossil fuels. I urge the government and electricity companies to address this issue urgently and stabilise this important industry to the advantage of all people.
