SOLAR FEED-IN TARIFFS 2017/18

Wednesday, 10 May 2017
9:52:37 PM

A fairer rate should be allocated to solar electricity which truly reflects the true value of your solar feed in. It should be mandatory for power company to increase feed in prices to reflect rising costs of electricity. I have recently had a problem with AGL regarding this problem until the matter was resolved through the Energy Ombudsman. It would appear that the government had lost control over the power companies.
