**SOLAR FEED-IN TARIFFS 2017/18**

**Friday, 19 May 2017**

3:57:05 PM

I support a fair price for solar as it is a major renewable energy source we need to help us reduce carbon emissions to prevent catastrophic climate change. I believe the feed-in tariff should increase in line with the wholesale price of electricity and should be regulated so retailers have to offer it as a minimum; The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar. My partner and I have our own rooftop solar pv and hot water. We get a very small rebate for the power we feed into the grid and so we are now considering our own battery storage.
