SOLAR FEED-IN TARIFFS 2017/18

Monday, 22 May 2017

11:46:45 AM

Dear IPART, I completely endorse the submission that there should be a fair price for Solar. The feed-in tariff should increase in line with the wholesale price of electricity. All suppliers should offer the fair price as a minimum not a benchmark range. We purchased Solar not only to help the government but to ensure that in our retirement we would not get huge electricity bills. It is a joke to receive so little return for all our outlay. Regards, Suzanne Waterman
