SOLAR FEED-IN TARIFFS 2017/18

Saturday, 20 May 2017

2:55:24 PM

I, and I suppose every other consumer support a fair price for solar. It is only reasonable that the feed-in tariff should increase in line with the wholesale price of electricity.

This should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum. The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar. Collectively, citizens with solar are significantly contributing towards clean energy in Australia and should be encouraged to do so with a fair price.
