SOLAR FEED-IN TARIFFS 2017/18

Saturday, 20 May 2017

11:35:12 AM

The government started this scheme and we came on board and spent in excess of \$15000 to install solar. We have gone from 66 cents to 10 cents per kwh !! This is robbery and someone is making a lot of money off our house. We are saving the environment and the feed in tariff should reflect how solar homes are offering health and environmental benefits!! The solar price should be regulated and the power companies should be held accountable for the price that they offer solar homes. The price of the feed in tariff should increase in line with all electricity prices. Why are the power companies allowed to rip off solar homes?? We provide a product and should be paid a fair price for it!!
