Submission: I strenuously object to the proposal by Solo water to allow effluent to flow from the Catherine Hill Bay development directly into the lagoon, and into the treasured Bay itself. The development was approved on condition that effluent would not be disposed of outside the new settlement area. This 'variation' (more like devastation) will have an outsize detrimental impact on the life of the Bay, its residents and regular visitors. It rides roughshod over everything that we who have called Catho home, at any point, hold dear. If we cannot stand in the way of cynical profiteering, the bare minimum we demand is the maintenance of recreation without poisoning.
