

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Saturday, 20 May 2017

12:32:06 PM

I put solar panels on our roof because we care for our environment, and have strong desire to support clean renewable energy, and it is also an investment to reduced the electricity bill. So it is important that the solar feed in tariff provide us with a fair return for our investment, at the moment 6.1 cent per kWh seems like a big rip off from the electricity generator whom can sell our power at many times of the 6.1 cents that they pay me.
