

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Sunday, 21 May 2017

9:36:36 AM

I am making this submission in support of changes to the feed-in tariff for solar. I strongly urge that IPART select a fair price for solar that recognizes its true value in terms of health, environment and cost. In addition, PV is saving huge amounts of money by producing electricity at times of peak demand. During the February heatwave in New South Wales rooftop solar on homes and businesses across the state were estimated to decrease the market price of wholesale electricity by \$888 million over three days.

Please raise the feed-in tariffs for solar so that this important form of energy generation becomes an even more obvious choice for homeowners and small businesses.

Thank You,

Tassia Kolesnikow
