**SOLAR FEED-IN TARIFFS 2017/18**

**Friday, 19 May 2017**  
11:33:12 AM

Hi. as a committed citizen I am always keen to make a difference for a better future. As part of this I have been investing into a number of measures to reduce our families carbon footprint. To keep this financially sustainable I am asking for a fairer price on solar feed in, the tariff should be adjusted in in line with the wholesale price of electricity, and should be regulated. The feed-in tariff should represent the true value of solar and if done well will avoid the need to buy battery systems which are a concern in terms of recycling.
