SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017
11:20:07 AM

I support producers of solar electricity being paid a fair price for the electricity they feed into the grid. In my view the fair price is an amount per KWh that is in line with the wholesale price of electricity. Photovoltaic generation of electricity is one of the most effective modes of energy generation in terms of costs to the environment through pollution.
