

**SUBMISSION TO IPART REVIEW**  
**SOLAR FEED-IN TARIFFS 2017/18**

**Monday, 22 May 2017**

1:18:54 PM

By having solar panels I believe that we are contributing to a cleaner and healthier environment. We signed an agreement 6 years ago for a feed in tariff of 66c, this was when the panels were a lot more expensive than they are now. The Government then broke the agreement and dropped the tariff to 60c and now 6c. We supported the scheme because we wanted to contribute to a healthier environment for our children, grandchildren and future generations. It would be justice that we be rewarded with an increased solar price.
