**SOLAR FEED-IN TARIFFS 2017/18**

**Tuesday, 9 May 2017**  
11:30:18 AM

I believe that 6c to 10c payment for renewable energy fed into the grid is unfairly low.

â€¢ We support a fair price for solar;

â€¢ The feed-in tariff should increase in line with the wholesale price of electricity;

â€¢ The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum;

â€¢ The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar
