SOLAR FEED-IN TARIFFS 2017/18

Saturday, 20 May 2017

10:26:50 AM

We installed solar at our house because we wanted to be party in creating a solar market in Austrlia. We want Australia and NSW to aim to meet more of the domestic and commercial demand for electricity through solar generation. To achive this goal we need:

- The feed-in tariff should increase in line with the wholesale price of electricity;
- The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum; and
- The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar.
