**SOLAR FEED-IN TARIFFS 2017/18**

**Tuesday, 9 May 2017**  
12:18:14 PM

I support the change to increase the solar feed in tariff to at least double of its current value. This is to:

- support a fair price for solar;
- increase it in line with the wholesale price of electricity;
- ensure it is not just be a benchmark range, but a regulated price so retailers have to offer it as a minimum;
- ensure it represents the true value of solar which means recognising the environmental and health benefits and the network benefits of rooftop solar; and
- allow our country to further develop low carbon energy creation.
