**SOLAR FEED-IN TARIFFS 2017/18**

**Friday, 19 May 2017**  
11:36:55 AM

I definitely support a fair price for solar;

The feed-in tariff should increase in line with the wholesale price of electricity;

The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum;

The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar; and

The performance of retailers supplying net meters is abysmal. In my case I have requested an exchange meter in October 2016, it is now May 2017 and still no sign of the replacement meter.
